Teamwork Rubric in Page 2

Report

Defense committee: ≥ 3 members (not including supervisor) and ≥ 1 external jury member.

35%
WEIGHT

Supervisor does not grade the FYP report.

Jury members (excluding supervisor) grade the report using rubric and submit online before defense.

Report Rubric in Page 3

Presentation

Jury members use presentation rubric to grade students' performance.

30%
WEIGHT

Supervisor does not grade the presentation.

Committee finalizes grades and produces final report → Chairman approves and signs.

Presentation Rubric in Page 4

TEAMWORK RUBRIC

GRADED BY THE SUPERVISOR

35%
WEIGHT

2 / 4

No.	Performance Indicator	Beginning (45-59)	Developing (60-75)	Accomplished(76-89)	Exemplary (90-100)	Weight
1	Goals establishment	Does not contribute to establishment of goals.	Occasionally contributes to establishing goals, but goals often not very realistic	Works with most of the team to establish goals that are mostly realistic	Works with the entire team to establish realistic goals	16%
2	Tasks are planned by the team	Does not plan tasks or does not clearly define tasks.	- Occasionally works with the team on establishing tasks. - Tasks are mostly ineffective	Works with most of the team to plan tasks that are mostly effective	Works with the entire team to plan effective tasks	16%
3	Objectives are met with participation of the team	- Does not participate in meeting objectives. - Participates, but assigned objectives are not met.	- Occasionally participates in meeting objectives. - Few assigned objectives are met.	- Participates with most of the team to meet some objectives. - Most assigned objectives are met.	Actively participates with the entire team in meeting all of the objectives	16%
4	Function effectively in a team work, providing leadership	Does not offer to perform or accept a lead role at any point during the project	Rarely takes a lead role during the project, or does so ineffectively.	Takes a significant lead role at some point in the project.	Takes significant lead roles that enhance the effectiveness of the team.	16%
5	Collaboration and communication in an inclusive environment	Regularly excludes or discourages one or more team members from participation	Occasionally excludes or discourages one or more team members from participation.	Rarely excludes or discourages any members from participation.	Actively ensures that all team members are engaged, with no team member left out.	16%
6	Collaboration and Teamwork (Peer-to-Peer Evaluation)	Regularly excludes or discourages one or more team members from participation	Occasionally excludes or discourages one or more team members from participation.	Rarely excludes or discourages any members from participation.	Actively ensures that all team members are engaged, with no team member left out.	20%

GRADED BY JURY

35%
WEIGHT

3 / 4

No.	Performance Indicator	Beginning (45-59)	Developing (60-75)	Accomplished (76-89)	Exemplary (90-100)	Weight	
						FYP1	FYP2
1	Report delivered on time	No	–	–	Yes	5%	5%
2	Abstract	Abstract is not indicative of the work done	Abstract is too brief, mentioning some aspects of the work	Abstract is adequately written with not much details	Abstract is complete covering all required aspects	5%	5%
3	Problem Statement	The problem statement has not been made	The problem statement has weak support with little evidence about the needs	A problem statement has been made with some evidence (references) and some needs identified	The problem has been shown to exist with strong supporting factual evidence (references) and all needs identified	10%	5%
4	Aims and Objectives	Most are missing.	Some are included.	Most are included.	All are included and detailed.	10%	5%
5	Literature Review	Does not gather information relevant to the project.	Collects very little information relevant to the project without meaningful interpretation and with limited organization.	Collects and organizes some information/literature with meaningful interpretation. Organization is limited.	Collects, organizes, and interprets a great deal of information and literature. The literature is well organized and analyzed.	25%	7%
6	Technical and non-technical constraints	Technical as well as non-technical constraints were not identified	Some technical and non-technical constraints were identified	Technical and non-technical constraints were identified	Detailed realistic technical constraints and non-technical constraints were identified	–	3%
7	Ethical Considerations	Ethical Considerations are not present	Ethical Considerations are barely mentioned	Ethical Considerations are included	Ethical Considerations are emphasized	–	3%
8	Standards	Standard not listed	–	–	Standards are listed	–	3%
9	Methodology	Most details are not included. Approach has major concerns of feasibility and correctness	Many details are not clear. Approach has several concerns of feasibility and correctness	Most details are included. Approach is appropriate but with some concerns of feasibility and correctness	Detailed and clear. The approach is scientifically sound, and a comprehensive feasibility study is included	15%	15%
10	Completeness	Project is not completed	Project is partly completed	Project completed according to the expectations	Project completeness beyond the expectations	–	5%
11	Alternative solutions	No design alternatives	Preliminary design alternatives very limited	Preliminary design alternatives included some aspects of the project	Preliminary design alternatives included for several aspects of the project	10%	10%
12	Contribution	No added contribution.	Few innovative aspects are present	Some innovative aspects are present	Innovative aspects are clearly found.	–	10%
13	Prototype	The prototype is not operational	The prototype is partly operational	The prototype is mostly operational	The prototype is completed and fully operational	–	10%
14	List of resources needed	Resources not listed	Few resources are listed	Some Resources are listed	Resources are listed	6%	3%
15	Timeline planning and schedule	Lack of planning is evident. No chart included	Few aspects of the plan have been developed. Chart missing most details	Some aspects of the plan have not been fully developed. Chart missing some details	Appropriate plan was devised with a sufficiently detailed chart	6%	3%
16	Overall text structure	Most are missing. Informal language is used for all specifications	Some are included. Language used is technical/formal for some specifications	Most are included. Language used is technical/formal for most specifications	All are included and detailed. Technical/formal language is used for most applications	5%	5%
17	References	Most references are not complete and/or not following IEEE	Few references are complete and follow IEEE formatting	Most references are complete and follow IEEE formatting	All references are complete and follow IEEE formatting	3%	3%
TOTAL						100%	100%

WEIGHT

4 / 4

No.	Performance Indicator	Beginning (45-59)	Developing (60-75)	Accomplished (76-89)	Exemplary (90-100)	Weight	
						FYP1	FYP2
1	Problem Definition (Identification of project needs, specification, research) (PER GROUP)	• Problem statement has not been made.	• Problem statement has weak support with little evidence.	• A problems statement has been made with some evidence.	• Project problem shown to exist with strong supporting evidence.	10%	5%
		• Most specifications are missing.	• Some specifications are included.	• Most specifications are included.	• All specifications are included and detailed.	3%	3%
		• Literature review is very minimal and not acceptable.	• Literature coverage and organization are limited. No attempt is made differentiate the work from the literature.	• Literature coverage is acceptable, but organization is limited. The work is not clearly differentiated from the literature.	• Literature is well covered. Organized and analyzed. The work is differentiated form literature.	7%	2%
2	Design (Methodology, alternatives, iteration, implementation and testing) (PER GROUP)	• Methodology has major concerns of feasibility and correctness.	• Methodology has several concerns of feasibility and correctness.	• Methodology is appropriate but with few concerns of feasibility and correctness.	• Methodology is very detailed and clear.	5%	10%
		• No alternatives were considered for the overall design and for components of the design.	• Limited alternatives were considered for the overall design and for very few relevant components of the design.	• Some alternatives were considered for the overall design and for some relevant components of the design.	• Sufficient alternatives were considered for the overall design and for all relevant components of the design.	5%	5%
		• No design decisions were taken with consideration to the constraints, specs and standards.	• Few design decisions were taken with consideration to the constraints, specs and standards.	• Most design decisions were taken with consideration to the constraints, specs and standards.	• All design decisions were taken with consideration to the constraints, specs and standards.	5%	5%
	Testing and evaluation of preliminary design components (PER GROUP)	Testing and evaluation of the preliminary design components are not done.	Testing and evaluation of the preliminary design components are not sufficient.	Testing and evaluation of the preliminary design components are sufficient.	Testing and evaluation of the preliminary design components are thorough.	–	5%
3	Quality of Presentation (Organization, slides and graphics) (PER GROUP)	• Slides are poorly designed and amount of text per slide is inappropriate; many misspellings and/or grammatical mistakes.	• Slides can be better designed and amount of text per slide appropriate; some misspellings and/or grammatical mistakes.	• Slides are in general clear and well designed (font size and amount of text per slide appropriate); few misspellings and/or grammatical mistakes.	• Slides are clear and very well designed (font size and amount of text per slide appropriate); no misspellings; and/or grammatical mistakes.	10%	10%
		• Insufficient supporting materials (graphics, examples, illustrations, analogies, references, demos, etc.) minimally support the presentation.	• Supporting materials (graphics, examples, illustrations, analogies, references, demos, etc.) partially support the presentation.	• Supporting materials (graphics, examples, illustrations, analogies, references, demos, etc.) generally support the presentation.	• A variety of supporting materials (graphics, examples, illustrations, analogies, references, demos, etc.) significantly support the presentation.	5%	5%
4	Oral Communication (Subject knowledge and delivery style during presentation and discussion) (PER STUDENT)	• Presenter does not seem to have grasp of the subject.	• Presenter has difficulty conveying the subject matter.	• Presenter demonstrates sufficient subject knowledge but fails to elaborate.	• Presenter demonstrates deep subject knowledge with explanations and elaborations.	25%	25%
		• Delivery techniques (posture, eye contact, vocal expressiveness, enthusiasm) detracts from the understandability of the presentation and speaker appears uncomfortable.	• Delivery techniques (posture, eye contact, vocal expressiveness, enthusiasm) make the presentation understandable and speaker appears tentative.	• Delivery techniques (posture, eye contact, vocal expressiveness, enthusiasm) make the presentation interesting and speaker appears comfortable.	• Delivery techniques (posture, eye contact, vocal expressiveness, enthusiasm) make the presentation compelling and speaker appears polished and confident.	15%	15%
		• Audience did not pay attention.	• Audience attention is weak.	• Audience attention has been maintained.	• Audience attention has been drawn and engaged.	10%	10%
TOTAL						100%	100%
